## PRESENTATION

The submissions will be categorized as **SCIENTIFIC ARTICLE (SA)** or **WORK IN PROGRESS (WIP)**. Initially, **Scientific Articles (SA)** can be submitted in the form of an **Extended Abstract**, with a maximum of 4 pages.

The formatting guidelines for submissions can be found on the congress website (<https://tins.org.br/index.php/pt/>) under "**Guidelines for Paper Preparation.**"

All works approved by the scientific committee will be published in the event proceedings, which will be made available in **digital format**.

All works approved by the scientific committee and submitted in their complete version will be invited to submit to journals recommended by the scientific committee (under negotiation).

### The congress areas include:

- Nuclear Sector Security and Protection
- Applications of Nuclear Engineering
- Nuclear Innovations
- Technologies in Nuclear Reactors
- Knowledge Management

**ATTENTION:** Do not include author information and affiliations in the body of the text. This information should only be added in the online submission form or after the work has been approved, in its final version.

## AWARDS

The "Admiral Álvaro Alberto Scientific Production Award 2023" aims to recognize the best papers published in the event proceedings and will include up to 5 (five) academic papers (up to 2 (two) per thematic area), submitted to the congress.

Participation in this initiative will involve both categories of the event, and registrations will follow the same process and submission schedule as for the congress papers.

The evaluation of the awarded papers will consist of three stages. The first stage involves the nomination by the evaluators of those papers with recognized academic quality that make a significant contribution to their field. Finally, in the second stage, the coordinators of each thematic area, based on the evaluators' nominations, select up to ten papers as potential award candidates.

## GENERAL INFORMATION

In general, the following points should be observed:

- Papers sent by email will not be accepted.
- Authors must decide among themselves who will submit the paper in the submission system.
- Only the corresponding author will receive the submission confirmation via email.
- Papers that do not conform to the established formatting standards will not be evaluated.
- Author information and affiliations should only be included in the body of the paper in its final version, i.e., after the evaluation results.
